

ABSTRACT

5 A printhead assembly is provided, comprising at least two printhead modules each comprising at least two printhead integrated circuits, each of which has nozzles formed therein for delivering printing fluid onto the surface of print media, and a support member supporting and carrying the printing fluid for the at least two printhead integrated circuits, and a casing in which the at least two printhead modules are arranged so as to be removably mounted in linearly aligned relationship. The assembly has an aggregate length and a number of printhead integrated circuits predetermined to provide for selected pagewidth printing.
